ACTION REPLAY MK VI

FOR THE COMMODORE CBM64/128

GOVAN ROAD, FENTON INDUSTRIAL ESTATE, FENTON, STOKE-ON-TRENT, ST4 2RS, ENGLAND. TEL 0782 744707 FAX 0782 744292

Congratulations!

On your purchase of the

ACTION REPLAY MARK VI

Dear CMD Customer,

Thank you for purchasing the Action Replay Mark VI cartridge. In our attempt to secure a source for this fine product, CMD has begun importing the Action Replay Mark VI (A.R.6) cartridge directly from Datel Electronics in England.

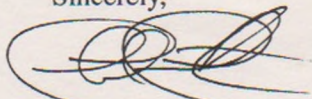

In order to comply with recent changes to the copyright laws in England, Datel was forced to make changes to A.R. 6 which eliminated the ability to use programs that were created using the cartridge's freeze feature without the cartridge being present in the computer. Because this change was made to comply with English laws, and the cartridge in its original form did not conflict with our laws, we were able to get Datel to substitute the full featured version which is version 5.2. This version actually provides you with more complete features than the version 6.0 that is currently being sold in the United Kingdom.

Although the cartridge itself is version 5.2, all documentation and packaging will show it as version 6.0. We apologize for any confusion that may have been caused by these changes, however, this substitution is to your benefit.

To help make up for the confusion, Datel has granted CMD the ability to include a copy of the Graphics Support Utilities disk with each Action Replay cartridge we sell. This option is valued at \$15.00 and is supplied to you at no additional cost, making the Action Replay Mark VI a great value.

Once again, we congratulate you on your purchase and hope that we will be able to service your Commodore computing needs for years to come.

Sincerely,

A handwritten signature in dark ink, appearing to read 'Charles A. Christianson', enclosed within a large, loopy oval flourish.

Charles A. Christianson

Vice President
