B.I.-80™

### Clear 80-column display for the Commodore 64™

Now there's a high-quality 80 column module for the Commodore 64™ that provides wide-column display for crystal clear visibility.

Designed and built by Batteries Included, the plug-in module eliminates the problems of snow, fuzziness, hashing or interference commonly encountered with other units. It gives optimum clarity, even with a full screen of characters, and can be easily switched from 40 column to 80 column display at any time.

B.I.-80™ can be used with Commodore™ color monitors 1701 or 1702, or any monochrome video monitor. It is fully self-initializing, with a complete 80 column operating system and the powerful BASIC 4.0 language built in. Just plug it into the cartridge slot and run!

B.I.-80™ uses the highest quality hardware throughout. It comes with a one year manufacturer's warranty, and full, easy-to-understand documentation, including a description of the BASIC 4.0 language.
