HOW TO USE
PaperClip™
WITH THE B.I.-80™
COLUMN ADAPTOR

It's easy. After installing the B.I.-80 adaptor, you only have to remember one thing - the LOAD command is different than when using PaperClip by itself.

1. First, install the B.I.-80 plug-in adaptor as directed by the user manual included in the B.I.-80 package.

2. Insert the PaperClip diskette into your disk drive. (Make sure your PaperClip key is properly inserted into the computer port #1).

3. To use PaperClip with the 80 column display, DO NOT FOLLOW THE LOAD COMMANDS in your PaperClip user manual. Instead, load PaperClip into your C-64 using the following command sequence:

type: **load "paperclip64?-80",8**

press: **RETURN**

The 1541 disk drive's red light should come on and the program should start loading. When loading is complete (disk drive red light goes out), type the following:
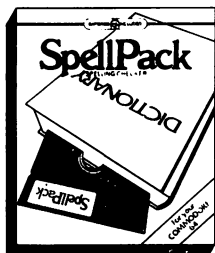

type: **run**

press: **RETURN**

You are now ready to start using PaperClip with the 80-column display. All other procedures and commands are exactly the same as your PaperClip manual says, except for the initial LOAD command described above.

NEED HELP?

If you are having trouble with PaperClip and/or the B.I.-80, contact Batteries Included Customer Support. We'll be glad to help you with technical advice and product information.

Please write to Batteries Included, Customer Support, 30 Mural St., Richmond Hill, Ontario, L4B 1B5 or call: (416) 881-9816.

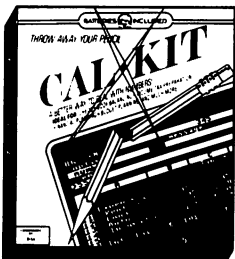

SPELLPACK: CHECKS AN ENTIRE DOCUMENT FOR SPELLING ERRORS - IN SECONDS!

Batteries Included's SpellPack spelling checker program works perfectly with PaperClip - to give you perfect prose! SpellPack contains a 20,000 word dictionary, to which you can add your own special words or technical terms. The program checks your text for errors, in seconds. If it finds a word not in the dictionary, you have the option of correcting the word (if mispelled) or adding it to the dictionary. All it takes is a couple of keystrokes.

Fast, simple and accurate - get SpellPack to relieve you of proofreading chores. It's the perfect complement to PaperClip.
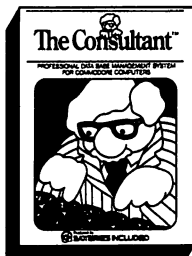

USE B.I.-80 WITH THE CONSULTANT AND CALKIT

The versatile B.I.-80 column adaptor works with other highly-acclaimed Batteries Included programs as well as PaperClip.

CALKIT: this simplified spreadsheet program helps you solve any problem involving rows and columns of numbers. Comes with built-in templates for the most common home and business calculating needs - from income tax to budgets to net worth. It's sophisticated - with advanced "What If?" capabilities - but

simple to learn and use. And you can program your own customized worksheets too!

To load with B.I.-80 TYPE: **LOAD "0:*",8,1**

The Consultant: "For a truly professional data management program, you will have to look a long time before you find a better one." So say the editors of "Home Applications For The C-64". And it's good for business applications, too. You can store large amounts of information, then search and compile it in many different ways. Powerful, but as with all B.I. products, it's easy to use.

To load with B.I.-80 TYPE: **LOAD "Consultant 64/80",8**

Use your B.I.-80 to take full advantage of these exciting home and business programs.

Write or call Batteries Included for more information, or ask your nearest dealer.
