Koala Light Pen™ for Commodore 64™

by Koala Technologies
Software developed by Audio Light, Inc.

*With the **Koala Light Pen** and your Commodore 64 computer you can create beautiful freehand drawings and geometric designs in full color—right on your T.V. screen!*

*Simply touch the screen with the light pen to make menu selections and let your imagination run free! The system is easy to use. Just plug the pen right into your Commodore 64, load the **Koalainter™** Software and suddenly the magic of light lets you create computerized masterpieces.*

*The **Koalainter** Software really lets you take advantage of the wonderful graphics capabilities of your Commodore 64. You can draw and paint using 16 vivid colors. You can choose from a collection of "paint brushes," edit your drawings with a built in "magnifying" tool, and even add different type styles to your drawings! What more could you want!*

Package contains:

- ▶ **Light Pen** (tip switch activated)
- ▶ **One diskette containing Koalainter Software**
- ▶ **Owner's Manual**

The Koala Light Pen is not recommended for use with persistent phosphor monitors.
